

# Why are Crumbs in Parks Bad?

Color these animals, and learn why crumbs can hurt wildlife.

Crumbs smell good, so animals come to eat them!

Some of them can make a real mess.

Some animals will move to places with a lot of crumbs, and never leave. It can get very crowded.

If animals get used to crumbs, they forget how to take care of themselves.

When it is crowded it can be hard for other animals to find space.
